NUBIAN PYRAMIDS

Egypt is famous for its ancient pyramids. But did you know that Sudan actually has the most pyramids in the world? Northern Sudan, which was once a region called 'Nubia,' holds 220 Nubian pyramids made of sandstone and granite. These structures were built by the ancient Kushite kingdoms and were ruled by Egyptian pharaohs who had fled Egypt.

About the De Winton Community Association

We were founded in 1918 and have been an Alberta Association Member since 1962.

Are you new to De Winton? On behalf of our amazing community, please allow us to welcome you and your family. We have a welcoming gift for you, along with some information about our local happenings, activities, and fabulous preschool. Please contact us directly at the Hall by phone or email. Also visit our website and sign up for our newsletter. Once again, welcome!

LIVING DINOSAURS

Crocodiles have been roaming the earth for over 150 million years, which basically makes them living dinosaurs. One thing that has helped them to survive is their incredible bite force – the strongest in the entire animal kingdom! Amazingly, saltwater crocodiles have a bite force of 3,700 pounds per square inch, which is the strongest bite ever recorded!

February Is Heart Month

Do you know the signs and symptoms of a heart attack and what to do if someone experiences these? Knowing may make the difference between life and death. Recognizing and responding immediately to the warning signs of a potential heart attack may significantly improve survival and recovery. February is Heart Month: take the time to be heart safe and learn how you can reduce your risk.

Common Signs of a Heart Attack

(Any, or all, of these signs and symptoms may occur)

- Chest discomfort described as simply a mild pressure up to a 'crushing' pain; may also be 'squeezing' or a 'heavy' sensation.
- Discomfort may move to the shoulders, arm, neck, or jaw.
- May include shortness of breath, sweating, or nausea/vomiting.
- Signs may vary person to person and can differ between men, women, and the elderly.

Heart Attack Risk Factors

- Obesity*
- Sedentary lifestyle*
- Smoking*
- High cholesterol*
- Age/Gender
- Family history

Speak with your doctor about how to treat your modifiable (*) risk factors and learn to be heart safe.

What To Do When Seconds Count

- Call 911, immediately. Early treatment can greatly reduce heart damage and be the difference between life and death.
- Treatment starts the moment EMS arrives. Paramedics can provide oxygen, start an intravenous, and perform an electrocardiogram (ECG).
- Paramedics can also administer important medication(s) in the early minutes of a heart attack to lessen heart damage.
- During transport, EMS will share information with the hospital so that definitive treatment can begin immediately upon arrival.
- Take a CPR/AED course. Training is widely available from many reputable organizations. It's easy and could make a significant difference in the outcome of someone experiencing a heart attack.

Overcaffeinated?

Many people don't realize that caffeine is a drug. It's a stimulant that's found in many types of pain and cold medicine, as well as in foods and drinks, including coffee, tea, chocolate, some energy drinks, and some painkillers.

What Are the Short-Term Effects?

The effects of caffeine usually start within five to 30 minutes and can last from eight to 12 hours.

Larger amounts of caffeine can:

- cause shaking
- make you have trouble sleeping
- make you very agitated
- cause a fast, irregular heartbeat (might feel like your heart is racing)
- make you feel irritable, restless, and nervous

People who have panic attacks shouldn't use large amounts of caffeine. It can trigger nervousness and anxiety, and they might be more sensitive to its effects.

It's rare for adults to die from a caffeine overdose. However, children can die from as little as one gram of caffeine. A single cup of coffee contains between 40 and 180 mg.

Caffeine doesn't decrease your appetite so there's no point in using it to diet or decrease your hunger.

Caffeine doesn't help you sober up if you are drunk.

As your body gets used to caffeine, it needs more and more of it to get the same effect. As the amount of caffeine goes up, so does the risk of side effects.

You can become mildly dependent on caffeine from regularly drinking 350 mg (about two to four cups of coffee) a day. If you suddenly stop drinking caffeine, you might have withdrawal symptoms such as:

- headaches
- problems sleeping
- feeling irritable, tired, and depressed
- lack of energy
- feeling down
- having trouble focusing or concentrating

Withdrawal symptoms begin 12 to 24 hours after you stop caffeine. Most symptoms go away within a few days.

What Are the Long-Term Effects of Caffeine?

More than 300 mg of caffeine (about two to three cups of coffee) in a day may be linked to miscarriages and low-birth weight babies. Caffeine is passed through breastmilk, which might make your baby irritable or have trouble sleeping. If you're pregnant or breastfeeding, you may want to limit or avoid all caffeine.

Some women who drink more than three cups a day may be at risk of bone fractures as they get older.

Regular use of more than 600 mg of caffeine might cause long-term effects including chronic insomnia, constant anxiety, depression, and stomach problems. It can also cause high blood pressure or make high blood pressure worse.

Caffeine and Young People

Because their bodies are smaller, caffeine may have a stronger effect on a child than on an adult. Children who drink pop or energy drinks with caffeine might feel anxious, be irritable, have trouble sleeping, or wet the bed.

Some teens and young adults who use a lot of caffeine may have health problems like an increased or abnormal heart rate or chest pain. If this happens, they may need to go to the hospital or need an ambulance.

For more information on caffeine and health, call the 24-hour Addiction Helpline at 1-866-332-2322.

Activities at the Hall in 2023

Fun Bridge is ideal for those who enjoy a good game of cards and socializing with other Bridge lovers. Our group gets together on Wednesdays from 10 am to Noon

Stretch class based on Hatha Yoga is held Monday 8:45 to 10 am and 7:15 to 8:30 pm and Thursday 9:30 to 10:45 am. Class is limited to 15.

For anyone who is an avid Quilter, we have a Quilting group that meets Monday from Noon to 4 as well as a group that meets Wednesday from 9:30 to 1pm. Group Size is limited

For further information or to register please call
Amanda Gotmy Our Hall Manager at 403-938-2525
or email at DWCA@platinum.ca

Mardi Gras

On February 24, 1857, New Orleans held its first Mardi Gras parade. Interestingly, attendees wore masks to conceal their identities and in so doing, they were able to escape society's rigid class constraints. Masks gave them the freedom to act however they wanted, with whomever. To this day, masks and parades remain sacred Mardi Gras traditions!

IS THERE A WEDDING
YOUR FUTURE?

INFORMATION.

Polar Bear Capital of the World

In Churchill, Manitoba, locals leave their cars and houses unlocked. Dubbed the 'polar bear capital of the world,' unlocked doors in this town are meant to give pedestrians safe refuge from polar bears in the streets. Churchill even has a Polar Bear Holding Facility, AKA 'polar bear jail,' for troublesome bears who spend too much time in the town!

Please allow us to introduce ourselves! We are
RAINBOW ELDERS CALGARY

A support group for 2SLGBTQ+ seniors

Rainbow Elders Calgary is a volunteer-run organization determined to make a significant difference in the lives of 2SLGBTQ+ seniors. We work to provide support and address issues such as social isolation, housing, and loneliness.

As seniors, we also believe that we have a responsibility to connect with and be role models for our vulnerable 2SLGBTQ+ youth.

We invite you to get to know us as we make major differences in the lives of both young and older members of our queer community.

To discover more, please contact us!
