Fresh Jock

No matter how much you sweat, we can get the stink out!

We offer cleaning services for sports equipment and personal protective equipment, including helmets, shoulder and elbow pads, knee and shin pads, footwear, skates, or gloves – almost any equipment used by athletes or workers can be cleaned, disinfected, & refreshed.

OUR OZONE PROCESS

Using ozone, our system breaks down and penetrates stains, mucus, blood, sweat, fungus, bacteria, and mould. Ozone destroys 99.9% of bacteria and viruses it comes in contact with – this includes odour causing bacteria and illness causing viruses, like staph infections.

Cute but not cuddly

Don't be fooled by these cutelings! Most wild babies just need to be left alone. Fledging birds are learning to fly while leverets (baby hares) and fawns rely on camouflage for protection while mom forages! Keep pets secure when wild young are around.

Calgary Wildlife is a registered charity and the only wildlife hospital within the City of Calgary. We promote positive wildlife-human interactions by giving educational talks at schools, community groups, and associations throughout the city.

Do you have teaching experience and a passion for wildlife? If so, we need YOU! Apply today to join our urban wildlife education team.

Stargazing with Pat J: Indoor Astronomy

by Patricia Jeffery © 2023, Calgary Centre of the Royal Astronomical Society of Canada

If you ever find yourself stuck inside due to illness or injury, freezing temperatures, or have simply reached the age where a night at home is more appealing than a night on the town, did you know you can still enjoy the majesty of the heavens without venturing beyond the comfort of your own home?

Orion nebula: through two panes of glass

Yes, I am well aware that hardcore astronomers would not recommend this approach as the multiple panes of glass will distort the image somewhat. But if the alternative is no stargazing at all, I think you'll be pleasantly surprised by what you can see while sitting next to a window. While the images won't be Hubble quality, they can still be pretty darn impressive.

Sun spots

Benefits of indoor astronomy

- Every clear night is a stargazing night
- Every clear day is a solar gazing day (Caution: you'll need a special filter for your telescope to safely observe the sun)
- No danger of frostbite (winter) or mosquito bites (summer)
- Jupiter's four largest moons are easily visible with a pair of binoculars
- Use binoculars to examine the moon at first quarter and third quarter, then use pencil and paper to sketch its surface
- Gain familiarity with the night sky with a smart phone astronomy app. Many good ones are free
- On nights when you're too stressed to sleep, instead of staring at the ceiling, try losing yourself in the serenity of the night sky
- When warmer weather returns, or recovery from your physical ailment occurs, you'll be primed and ready to pack up your astronomy gear and head outside
- Or you may discover you enjoy indoor astronomy so much that you've become a year-round convert.

News from the Friends of Nose Hill

by Anne Burke

Guided Plant and Herb Walk

A guided plant and herb walk on Nose Hill taught attendees about local landscape and ecology (living things and habitat). The group identified plants, whether edible or poisonous ones, as well as invasive plants (weeds) and native species.

There is much interest in traditional medicine and modern uses. Agrology deals with the natural, economic, and social sciences related to environmental protection. The walk leader, as a member of the Alberta Institute of Agrologists, has studied the application of science to agriculture. It is important to understand that Calgary's Parks & Pathways Bylaw prohibits foraging as part of these events.

City Nature Challenge 2023

Here are the results for the City Nature Challenge 2023! Across Canada, 43 cities were in this year's challenge. Calgary was first for observers, with 9,185 who reported 775 species. Calgary came in fourth for 347 observations. Globally, there were 482 cities, with 66,394 participants who reported 57, 227 species, including 2,570 rare, endangered, or threatened ones.

World Migratory Bird Day

Light pollution remains a threat to migrating birds. To raise awareness in Canada, World Migratory Bird Day was on the second Saturday in May and, in South America, will be on the second Saturday in October.

10. World _____ Day celebrates this intellectual two player board game.
11. On July 6, 1885, Louis Pasteur successfully administered this vaccination for the first time, replacing the previous treatment, mad stones.

Proper Disposal of Smoking Materials

from the City of Calgary

Improper disposal of smoking material such as tobacco products is the leading cause of outdoor fires in Calgary. To help reduce outdoor fire risks, citizens should make an effort to properly dispose of smoking material. Remember to always call 911 to report a fire.

To Better Protect Your Homes, it is Recommended That You:

- Never put out cigarettes or smoking material in flower planters, peat moss, your lawn, or garden.
- Use a deep, wide, sturdy metal container with a lid, filled part way with sand or water that should be emptied regularly.
- Ensure that all butts and ash are out by soaking them with water prior to putting in the trash.

Smoking in Natural Areas

Extreme caution should be used in the city's natural areas and green spaces where extremely dry vegetation covering the ground provides readily combustible fuel if an ignition source is applied.

Reducing Risk

- Do not store propane tanks, firewood, or yard waste next to your house.
- Prune all tree branches within two metres of the ground and plant new trees at least three metres apart.
- Assess potential fire hazards within 1.5 metres of your home, including natural debris, trees, and other structures.

Smoke Alarms

Having working smoke alarms saves lives – more than one-third of all fire fatalities are associated with having no smoke alarm.

Cigarette Litter

Did you know that cigarette litter is a major environmental concern and contributes to a disproportionate amount of litter in our city? Contrary to popular belief, those white sponge-like butts are not made from cotton or paper — instead, they're a

synthetic microfibre that takes years to break down and are unsightly around our city.

- Cigarette filters are one of the most littered items in the world.
- Chemicals that can leach out of cigarette butts include arsenic, ammonia, and lead. The chemicals found in one cigarette butt can leach out and contaminate approximately 7.5 litres of water within one hour. This contaminated water is lethal to aquatic life.
- Sunlight will degrade a cigarette filter and break it into very small particles. These small pieces do not disappear or biodegrade but wind up in the soil or swept in water, contributing to water pollution.
- The fines for the improper disposal of cigarette litter ranges from \$250 to \$500, with a maximum fine of \$750 for throwing a butt out of a car window.

If you're a smoker, consider buying a pocket ashtray available locally and from popular online retailers.

How to Get the Most Out of Your Counselling/Therapy Sessions

by Nancy Bergeron, R.Psych. | nancy@viewpointcalgary.ca

Adapted from Dr. David Burns

We understand that therapy can sometimes be challenging

People often report that unburdening their emotions and past experiences in the first few sessions is relieving. However, therapy often uncovers deeper issues. Opening up and getting to the heart of these concerns takes patience, persistent effort, and fostering a positive relationship with your counsellor. It takes time to build a strong therapeutic bond and rapport, and this is essential in creating the trust necessary to go to those deeper places where real change takes place.

Consistency will help you reach your goals

If you wanted to improve your fitness and saw your physical trainer once every three months, you probably wouldn't be surprised when you didn't see the results you wanted. Similarly, therapy needs commitment and consistency to work through your concerns and be effective. Of course, your counsellor understands there are many demands on your time and resources. By collaborating with your counsellor, you can create a reasonable plan that balances

your commitment to your wellbeing with all your other commitments. This is also why sometimes your therapist may assign you homework or other types of activities to practice between sessions.

Providing feedback will help your counsellor know what is/isn't working for you

Counsellors strive to build positive, non-judgmental, and compassionate therapeutic relationships, understanding this is beneficial for you and the therapeutic process. Despite this emotional and professional commitment, challenges in therapy can sometimes break down open communication and hinder the process. Providing feedback allows your counsellor to understand what has happened and work to repair any concerns you may have. A great therapist will provide a feedback form that can be filled out at the end of each session. Here you can let your therapist know what you liked best in the session, what you liked the least, and if there were things you had hoped to discuss that may have been missed. This allows your therapist to constantly adjust and better hone their skills to your needs.

Mutually agreeing to end therapy when you are ready

When you and your counsellor recognize you are ready to move on, it can be exciting for both of you. In order to ensure you finish on a positive note, your counsellor will help you plan how to maintain your progress and what to do if you encounter concerns again. You have a fresh start, and your counsellor will be there in the future if needed.

Sometimes clients end therapy without talking with their counsellor, leaving their counsellor to wonder what happened. Not only can this make it more difficult for clients to maintain progress, but they may also feel they have lost a potential future support. If the counsellor can't reach the client, it also leaves the counsellor wondering what happened. Did my client feel enough progress had already been made? Did something go wrong? Did I say or do something that upset my client? Counsellors invest emotionally and professionally in the therapeutic relationship and appreciate feedback that lets them know what is happening. Your counsellor will always strive to treat you and your decisions with compassion and respect. In return, you can help your counsellor by communicating any concerns and showing that you understand they deserve compassion and respect too.

Heat Related Illness

from Alberta Health Services

EMS would like to remind everyone to stay safe in the heat and sun this season. While children and the elderly may be more susceptible to the effects of heat and sun, basic prevention measures should be taken by all to avoid a heat related illness during periods of hot and humid weather.

Heat Exhaustion

- Heat exhaustion can occur due to excessive fluid loss during periods of prolonged sweating in a hot and/or humid environment (indoors or outdoors).
- Patients may suffer headaches, weakness, fatigue, nausea/vomiting, thirst, chills, and profuse sweating.
- The patient is usually cold and damp to the touch and the skin may appear pale or dusky gray.

Heat Stroke

- Heat stroke is a medical emergency which, without prompt treatment, could be fatal.
- It occurs when the body can't cool itself naturally (e.g., perspiration). The body's temperature will continue to rise to dangerous levels.
- Due to severe dehydration and the inability to sweat, the patient may appear flushed, and skin may be hot and dry to the touch.

First Aid

- First aid for all heat related illness begins with removing or sheltering the patient from the hot environment.
- Remove excess, or tight-fitting clothing, and allow them to rest in a cool environment.
- If the patient is conscious and alert, provide suitable fluids such as water, juice, or a sports drink.
- If you are concerned, seek medical attention.

Prevention

- Stay well-hydrated by drinking plenty of water at all times.
- Be aware that excessive alcohol consumption will promote dehydration.
- Always wear a broad brimmed hat to keep the sun off your face and neck.

- Apply a broad spectrum, waterproof sunscreen with a minimum SPF of 30+, especially for children. The sun's UV rays peak between 11:00 am and 3:00 pm, even on cloudy days.

Why Calcium Matters

from Alberta Health Services

Calcium keeps your bones and muscles—including your heart—healthy and strong.

Your body needs vitamin D to absorb calcium. People who do not get enough calcium and vitamin D throughout life have an increased chance of having thin and brittle bones (osteoporosis) in their later years. Thin and brittle bones break easily and can lead to serious injuries. This is why it is important for you to get enough calcium and vitamin D at every age.

Your body also uses vitamin D to help your muscles absorb calcium and work well. If your muscles don't get enough calcium, then they can cramp, hurt, or feel weak. You may have long-term (chronic) muscle aches and pains.

How much calcium do you need?

How much calcium you need each day changes as you age. Here are the recommended dietary allowances (RDAs) for calcium:

- Ages one to three years: 700 milligrams
- Ages four to eight years: 1,000 milligrams
- Ages nine to 18 years: 1,300 milligrams
- Ages 19 to 50 years: 1,000 milligrams
- Males 51 to 70 years: 1,000 milligrams
- Females 51 to 70 years: 1,200 milligrams
- Ages 71 and older: 1,200 milligrams

If you are pregnant or breastfeeding, you need the same amount of calcium as other people your age.

How can you get enough calcium?

Calcium is in foods such as milk, cheese, and yogurt. Vegetables such as broccoli, kale, and Chinese cabbage also contain calcium. You can also get calcium if you eat the soft edible bones in canned sardines and canned salmon. Foods with added (fortified) calcium include some cereals, juices, soy beverages, and tofu. The food label will show how much calcium was added.

You can figure out how much calcium is in a food by looking at the percent daily value section on the nutrition facts label. The food label assumes the daily value of calcium is 1,100 mg. If one serving of a food has a daily value of 20 percent of calcium, that food has 220 mg of calcium in one serving.

Two common calcium supplements are calcium citrate and calcium carbonate. Calcium carbonate is best absorbed when it is taken with food. Calcium citrate can be absorbed well with or without food. Spreading calcium out over the course of the day can reduce stomach upset and allows your body to absorb it better. Try not to take more than 500 mg of calcium supplement at one time.

For more information, call Health Link toll-free at 811.

Calgary Summers are Getting Increasingly Hotter and Drier

from the City of Calgary

Extreme heat can put your health at risk, causing illnesses like heat stroke and even death. An extreme heat warning is issued when two or more consecutive days of daytime maximum temperatures are expected to reach 32 degrees Celsius or warmer and nighttime minimum temperatures are expected to be 16 degrees Celsius or warmer.

The following tips will help keep you safe during this extreme heat:

- Avoid working or exercising intensely in the heat or humidity when possible.
- Drink plenty of water to decrease your risk of dehydration.
- Have cool drinks in your vehicle and keep your gas tank full.
- Wear sunscreen.
- Never leave people or pets inside a parked vehicle.
- Close curtains and blinds during the day.
- Open windows for cooler air if safe.
- Avoid using your oven, if possible.
- Take cool showers/baths or go to an air-conditioned public space.
- Look at weather forecasts to know when to take extra care.
- Call 911 if you see an animal left in a hot parked vehicle.
- Look out for your pets. Avoid hot surfaces that might hurt to walk on and ensure that they have plenty of water.
- Heat stroke is a medical emergency. If you experience any symptoms, call 9-1-1 immediately.

To learn more about what you can do to protect yourself and your family, visit calgary.ca/getready.

 @WynessJennifer @JenniferWyness

I hope everyone is enjoying the summer! Read more for some tips on gardening in Calgary and how to keep our off-leash parks enjoyable for everyone.

‘Bee’ YardSmart

YardSmart is an online resource that can help you grow a healthy garden.

Visit calgary.ca/yardsmart to learn how to create a beautiful yard that is easy to maintain and is suited for Calgary’s unique climate.

YardSmart offers advice on choosing garden bed layouts – wet, dry, or a combination of sun and shade. It also offers plant lists to help you choose beautiful and low-maintenance plants at your local garden centre, and how-to videos for gardening on a budget. You can also visit calgary.ca/droughtinfo for tips on caring for your yard during the dry season.

Off-Leash Dog Parks

Calgary is a haven for dog lovers, and there are plenty of off-leash parks across the city. In the summer, many pet owners are eager to enjoy the warm weather and spend time with their furry friends. However, it’s important to ensure that off-leash parks are enjoyable for everyone. Here are some guidelines on how to create a secure environment for pets and fellow park-goers.

- Know the regulations of each dog park you visit. This includes size restrictions, leash policies, and keeping your dog’s vaccinations up to date.
- Make sure your dog is well-trained and socialized. Basic commands like “sit,” “stay,” and “come” can go a long way in managing their behaviour.
- Keep a close eye on your dog. Stay within a reasonable distance and maintain control over their actions.
- Communicate with fellow dog owners. Respect their space and recognize any signs of discomfort or tension between dogs.
- Carry essential supplies like water and waste bags. Clean up after your pet to keep our parks hygienic.

To learn more, check out our video series at calgary.ca/pets/licences.
