## News from the Friends of Nose Hill

by Anne Burke

Spring brought renewal and awakening of Mother Earth in April. There was a three-hour interpretive walk to connect with cultural landscapes through the ages in Nose Hill Park where attendees could be closer to the stars.

The group at the John Laurie Blvd parking lot began the 2.2 km route on pathway and gravel trail. The leaders were Crystal Many Fingers, a Blackfoot member of the Kainai First Nation of Treaty 7, and Laureen Bryant, a professional archaeologist who focused on human occupation.

Legends and sharing stories are an integral part of an oral culture. The importance of Nose Hill to pre-contact indigenous people is highlighted by sites such as the buffalo rubbing stone for ceremonies, vision questing, and fasting.

A natural area is a City-owned park with a natural/native plant community. Our primary role is to preserve the natural significance. Conservation protects these (relatively) undisturbed parcels of land. Damage can be repaired while loss can be restored.

Public engagement and feedback from tourists will contribute to Calgary's 20-year Park Plan. After a draft proposal, there comes a final version by spring 2024, before presentation to City Council. For more information, visit <https://engage.calgary.ca/parksplan>.

## O Brave New World!

You might think Aldous Huxley's 1932 novel, *Brave New World*, could have nothing to do with a 400-year-old play. However, the name for Huxley's novel comes from a line in Shakespeare's *The Tempest*. An island-dwelling girl named Miranda exclaims "O brave new world" when a group of shipwrecked men wash up on the shore of her secluded island.

Dear Residents of Ward 4,

I hope this message finds you well. I want to take a moment to discuss the importance of preserving natural areas in our community. Natural areas are a unique type of park space that play a vital role in supporting the biodiversity of our city. These spaces provide a natural environment for plants, insects, birds, and other wildlife to thrive while also offering a place for the public to access and enjoy.

Unlike manicured parks, natural areas do not require the same level or frequency of management. It may be tempting to mow or trim natural area vegetation near your property line, but doing so can have damaging effects on the natural area. Mowing removes wildlife habitat and alters the local ecological system, diminishing the health and integrity of natural areas and reducing their ability to provide benefits like stormwater storage and filtration, carbon sequestration, and pollinator habitat.

Furthermore, mowing interferes with everyone's ability to enjoy the natural aesthetic of these areas. Therefore, it is crucial to understand that maintenance methods like mowing and weed control are different for natural areas versus manicured parks. By avoiding mowing into natural areas, you can help protect native plants, animals, and the ecological systems that allow them to thrive in our city.

Remember, park space is available for all Calgarians to enjoy. For more information on natural areas and how they are maintained, please visit <https://www.calgary.ca/parks/natural-areas> or contact 311.

Additionally, I want to bring your attention to the issue of pooled water on streets during heavy rainfalls. If you notice water accumulating around storm drains and it hasn't drained within 90 minutes, take a photo and report it using the 311 app or through an online request at [calgary.ca/stormdrains](https://www.calgary.ca/stormdrains). This will help the City's crews prioritize their response. However, if the water poses an immediate threat to safety or is entering a building, please contact 311 immediately.

Let's work together to preserve our natural areas and keep our community safe during heavy rainfall.

Thank you for your attention.

Best regards,

Sean Chu
