What Really Happens to Your Green Cart Waste?

by The City of Calgary Waste and Recycling Services

Food and yard waste collected through the Green Cart program is turned into nutrient-rich compost for use by farmers, gardeners, and landscapers.

If you don't separate your food scraps from your garbage it will end up buried in the landfill where it doesn't break down or turn into soil.

Separating your food scraps in your green bin makes a big difference.

Follow these tips for separating food scraps and using your green cart:

- Remove food from its packaging before putting it in your green cart.
- Use a kitchen pail or reuse any container with a lid (like an ice cream bucket) to store food scraps until you throw them in your green cart.
- You can control odours and keep your cart clean by using a certified compostable bag, paper bag, or newspaper liner in your kitchen pail.
- Use a small amount of baking soda in your kitchen pail to prevent odours.

Check calgary.ca/foodscraps for more tips to make your green bin a winner!

3-1-1 Calgary App Gets an Update

by The City of Calgary

The newly updated 3-1-1 Calgary app empowers Calgarians to work together, covering more than 90 City services. Every photo and report submitted helps The City respond more quickly and helps improve service delivery keeping our communities running smoothly. "Use the app when you notice issues and encourage your neighbours and friends to do the same," says Gilberto Ancheta, 3-1-1 Coordinator.

How to Use the App

Report issues you see like potholes, graffiti, or missed waste collection. Simply describe the concern, upload photos, tag the location, and submit your request.

New Changes

New features include real-time status updates on submitted requests, allowing users to track progress and receive notifications. The app also includes a built-in City news feed sharing key programs, services, and updates. With only 30 percent of 3-1-1 requests coming through the app, there's opportunity to grow this efficient digital option. Download the Calgary 3-1-1 app today and help spread the word.

News from the Friends of Nose Hill

by Anne Burke

Long ago, what we know as Alberta was underwater, covered by the ocean and surrounded by tropical forests. As many as 20 major glacial advances and retreats reshaped the landscape, including the continuous plateau of Nose Hill and Lake Calgary. Nose Hill provides spectacular views of the Bow River Valley and the uplands across the valley. Their geological history began in the floodplain of the Bow River which flowed at the top level of the present Hill where the river deposited gravel, sand, and mud. These are relatively thin on the steeper slopes. Nose Hill is bounded by the overflow spillway system, now Beddington and Nose Creek. Big Hill Springs Coulee is what remains.

Erratics are stones, boulders, or big blocks picked up and moved from one place to another during the last ice age. There are many in Nose Hill Park traced to a landslide from Mount Edith Cavell in Jasper National Park; they are part of a series across the Foothills region of Alberta. The Foothills Erratics Train runs from near Hinton, Alberta, to the Montana border. Some large boulders, such as the Nose Hill Buffalo Rubbing Stone, were used centuries ago. You can hike up to the Nose Hill 64 Avenue Glacial Erratic from the parking lot off 14 Street NW. At the top of Nose Hill Park there are several scattered glacial erratics of different sizes grouped close together. The Nose Hill Brisebois Glacial Erratic is between the south Nose Hill Parking Lot at Brisebois Drive and John Laurie Blvd. The Nose Hill Tower Glacial Erratic is on the top of the hill near transmission poles and a small building. Access is by an uphill hike from the North Hill SE Parking Lot along an old access road.
