LIGHTNING STRIKE!

You may associate getting struck by lightning with electricity. But you can't forget about the extreme heat! Lightning can heat the air it passes through to 50,000 degrees Fahrenheit (27,760 degrees Celsius), which is five times hotter than the surface of the sun!

News from the Friends of Nose Hill

by Anne Burke

Sites of prehistoric interest relate to the precontact history of Native use and settlement. These valuable archaeological resources represent 10,000+ years of occupation by Native inhabitants of the Calgary region. In all, 45 archaeological sites on Nose Hill have been recorded. Stone feature sites include cairns (a human-made pile of stones as a landmark, marker, or memorial), alignments (arrangements in a straight line or correct relative positions), and stone circles. Archaeological studies of Nose Hill began in the early 1970s. Students from the University of Calgary carried out surveys of the entire Calgary region; five prehistoric sites were recorded in what is now the park. These include three tipi ring sites, a lithic (stone) scatter, and a prehistoric campsite.

When the City planned a municipal park for Nose Hill, a Historical Resources Inventory was required in 1978 within the proposed boundaries. The results were a cairn, ten campsites (two with tipi rings), a glacial erratic, four isolated finds, a kill site, 18 lithic scatters, a rock mound site of overgrown gravel, and six tipi ring sites. The Alberta Government in Edmonton held microfiche copies of permit and research reports, in which existing resources were described. In 1982 and 1983, a spring survey of stone circles along the southern margin of the uplands of Nose Hill recorded 60 new rings. This was followed by a series of field trips in the summer and fall of 1993. Conditions were poor, with high grass. The focus was on undisturbed sites but limited to revisiting all the original sites. Aerial photo mosaics of Nose Hill were prepared. Overlays combining trails and archaeological resources were used to relocate sites in the field. Best estimates of site locations were recorded using a GPS receiver.

Dear Neighbours,

As the weather turns colder and the holiday season approaches, I want to wish you and your loved ones joy, peace, and time to rest and reconnect with family and friends.

I know that the past few months have been challenging, particularly with the recent teachers' strike and the government's decision to invoke the notwithstanding clause. Over the past weeks, many of you have reached out to share your concerns, your support, and your steadfast advocacy for educators. I am deeply grateful for your engagement and your commitment to a fair and compassionate community. To the families who have anxiety regarding education, rest assured our teachers are the very best and myself and my colleagues will continue to fight to get them the support they need to give our kids the start in life they all deserve.

I'll be looking forward to seeing you all at holiday celebrations across our communities. This season brings out the best of what it is to be Albertan, and I always love to see the community come together.

As we head into the new year, I remain dedicated to representing your voices in the legislature and working hard on the issues that matter most to our community. My team and I are always here to listen and support you in any way we can. Please don't hesitate to reach out.

Warm regards,

MLA Amanda Chapman

BUSINESS CLASSIFIEDS

For business classified ad rates contact Great News Media at 403-720-0762 or sales@greatnewsmedia.ca

OFFICIAL PLUMBING & HEATING: Small company, low overhead, excellent warranties, and great rates. Specializing in residential service and installs. Ancient Water

In December 2016, University of Toronto scientists presented findings of the world's oldest known water approximately 2 billion years old found at Kidd Mine near Timmins, Ontario. Talk about "ancient" water, older than humans even older than dinosaurs!
