Flame-Proof Your Kitchen: Fire Prevention Week Puts Safety on the Front Burner!

from the City of Calgary

As autumn begins to set in and the cozy scent of comfort foods fills the air, we're reminded of the joys of cooking in our kitchens. With the joy of cooking, it's essential to remember our responsibility for fire safety.

This year, from October 8 to 14, the Calgary Fire Department (CFD) is proud to observe Fire Prevention Week with the theme, "Cooking safety starts with you. Pay attention to fire prevention."

Cooking-related incidents are the leading cause of indoor fires and injuries in Calgary. The CFD urges everyone to prioritize safety in the kitchen.

Never leave cooking unattended and set a timer to remind yourself. If you must leave the kitchen, turn off the burners.

Turn pot handles away from the stove's edge. Keep a lid and oven mitt nearby to smother small grease fires.

Maintain a one-meter "kid- and pet-free zone" around cooking areas. This includes tripping hazards such as toys.

Additional tips and reminders:

- Keep flammable items away from the stovetop.
- Educate children about hot objects to prevent scalding injuries.
- Grill outdoors, away from structures, with a one-metre safety zone for children and pets.
- Use microwave ovens safely; avoid extension cords and open food cautiously.
- Avoid cooking when tired or after consuming alcohol or medication.

Follow these tips to keep your homes and loved ones safe. Together, we can ensure our kitchens remain places of joy and comfort, free from the risk of fires.

For more information, visit calgary.ca/firepreventionweek or call 3-1-1.

by Anne Burke

Exploring Nose Hill: A Hands-On Field Guide by Jill Kirker and Diana Kary was published by Grassroots NW: Environmental Awareness Society; it offers an introduction explaining why people should study Nose Hill Park and "how to" use this guide. There are maps of tours such as the NW Interpretive one and those of Meadowlark Prairie, Many Owls Valley, Wintering Hill, (Buffalo) Rubbing Stone Hill, and Porcupine Valley. After Nose Hill geology and an erratic boulder as part of a glacial lake, there is more about Nose Hill human history.

Check out tepee rings, native stories, the Blackfoot Nation, and exploration and settlement. The six habitats are fescue grasslands, previously cultivated land, shrubs, aspen groves, gravel, and wetlands. Suggested activities are for biodiversity, prairie field study, a mural of the prairie community, a grasslands species and food web, or hands-on weed control. With so many animal types there are also activities related to grouse, raptors, bird migration, ants, grasshoppers, gophers, ground squirrels, and mule deer on the Island Game. Learn more about the food chain, ecosystem, and sampling life in the pond-area wetlands. Studies can lead to other native grass areas of Calgary and designing wildlife corridors. Another important topic that is touched on is the world-wide issue of endangered species and grasslands.

Phase 2 engagement begins in October focusing on Calgary's 20-year plan for how we develop, redevelop, and manage parks. Fall 2023 feedback will be on public park policies. Input is also needed from businesses, agencies, and organizations. A 'What We Heard' report from Phase 2 will be published in winter 2023. Phase 3 engagement will inform a draft plan. By spring 2024, the 'Connect: Calgary's Parks Plan' will be final and then presented to City Council in summer 2024. Have your say at <https://engage.calgary.ca/parksplan>.

No matter how much you sweat, we can get the stink out!

We offer cleaning services for sports equipment and personal protective equipment, including helmets, shoulder and elbow pads, knee and shin pads, footwear, skates, or gloves – almost any equipment used by athletes or workers can be cleaned, disinfected, & refreshed.

OUR OZONE PROCESS

Using ozone, our system breaks down and penetrates stains, mucus, blood, sweat, fungus, bacteria, and mould. Ozone destroys 99.9% of bacteria and viruses it comes in contact with – this includes odour causing bacteria and illness causing viruses, like staph infections.

Halloween Safety

from Alberta Health Services

The members of Calgary's Partners for Safety: Calgary's Child Magazine, AHS EMS, Calgary Police, Fire, 911, Bylaw, and Transit would like to remind parents and trick-or-treaters of some Halloween safety tips as October 31 approaches. Partners for Safety vehicles will be out patrolling communities on Halloween night to provide a visible safety resource for parents and trick-or-treaters.

Trick-or-Treaters

- Remember: All regular pedestrian rules still apply. Be sure to cross the road at marked crosswalks, or well-lit corners only. It is safest to work your way up one side of the street, and then cross once to the other side.
- Avoid houses that are not well lit. Do not accept rides from strangers or enter any home you feel is unsafe.
- Let your parents know where you are going to be at all times (route) and advise them if you will be late returning.

Parents

- Be certain that young trick-or-treaters are accompanied by an adult. Older children should stay in groups.
- Pre-determine boundaries to trick-or-treat within and establish a firm time to return home.

- Advise children not to eat anything until they return home. Dispose of any items that appear to have been tampered with, or that are not properly wrapped.

Costumes

- Choose bright coloured costumes that are highly visible. Adding reflective tape to costumes further increases visibility.
- Consider sending your children with a flashlight for additional safety and increased visibility.
- When purchasing or making costumes, look for materials and accessories that are labeled flame-resistant.
- All costume accessories, such as sticks, rods, or wands, should be soft and flexible, with no sharp edges.
- Consider using hypoallergenic make-up kits instead of masks that may impair breathing, or vision.
- Be sure costumes are loose enough to be worn over warm clothing, but not so long that they become a tripping hazard. Costumes should not be longer than your child's ankles.
- Ensure your child is wearing adequate footwear that takes into consideration weather conditions and walking.

Fall Candle Care: How to Prevent Tunneling

by Evermore Handmade, Local Candle Business

Fall is a popular time for candlelight and cozy nights in, which means dusting off your candle collection. You might notice that some have developed a deep “tunnel” around the wick, making it difficult to light. Tunneling also shortens the life of your candle as only the wax in

the centre of the candle will burn down.

Here are a few easy ways to prevent or fix tunneling so you can enjoy your favourite candles this season:

Prevention

When you light a candle for the first time, allow it to burn long enough to melt all the way to the edges of the candle jar. This ensures an even burn for the duration of your candle’s life as wax has a “memory” so to speak. The first burn sets the tone for subsequent burns and will help you get the most burn-time out of your new candle.

If you find that your candles are constantly tunneling, despite letting the wax melt to the edges of the jar, consider buying higher quality candles. Most candles on the market are made of paraffin wax (a toxic byproduct of petroleum) and are more predisposed to tunneling. Higher grade waxes like coconut, soy, or beeswax burn cleaner, longer, and more evenly.

The Fix

If you have an old candle that’s already tunneling, here are two easy ways to fix it:

1. Set your oven to 80°C (176°F) then remove anything flammable from your candle, such as labels or string. Once the oven is hot, place your candle on a baking tray for five minutes. This should heat the entire surface of the wax, making it smooth. With oven mitts, remove the candle and let it cool before lighting it.
2. Wrap aluminum foil around the top of your candle and angle it inwards like a dome. Ensure that the flame is far enough away from the foil and that there is still a hole to vent air. The foil will help the wax to heat up evenly. Keep a careful eye on your candle until the top layer of wax has melted, leaving a smooth surface, then remove the foil.

With these easy steps, you can enjoy your candles this season without any tunneling. If this article helped you, be sure to share it with a friend or loved one!

Quality work with a warranty! www.gutterdoctor.ca, 403-714-0711.

A HALLOWEEN DISGUISE

Halloween costumes have been around for over 2,000 years! This tradition began with the Celtic festival of Samhain, which marked the end of harvest season. It was believed that on October 31, spirits could walk the Earth. To honour the spirits and keep themselves safe by blending in, Celts donned disguises made of animal heads and skin.
