A Modern Jonah

On February 13, 2025, Adrián Simancas experienced something truly biblical. While kayaking off Chile's Patagonian coast, Simancas was briefly swallowed by a humpback whale. The encounter, filmed by his father, lasted only a few seconds with the whale luckily spitting him out. What an over-whale-ming experience!

Word of the Month

Malapropism: noun (mal-uh-prop-iz-uhm)

The unintentional use of a word that sounds somewhat like the one intended but is very wrong in the context.

February Is Heart Month

by Alberta Health Services

Do you know the signs and symptoms of a heart attack and what to do if someone experiences these? Knowing may make the difference between life and death. Recognizing and responding immediately to the warning signs of a potential heart attack may significantly improve survival and recovery. February is Heart Month: take the time to be heart safe and learn how you can reduce your risk.

Common Signs of a Heart Attack

(Any, or all, of these signs and symptoms may occur)

- Chest discomfort described as simply a mild pressure up to a 'crushing' pain; may also be 'squeezing' or a 'heavy' sensation.
- Discomfort may move to the shoulders, arm, neck, or jaw.
- May include shortness of breath, sweating, or nausea/vomiting.
- Signs may vary person to person and can differ between men, women, and the elderly.

Heart Attack Risk Factors

- Obesity*
- Sedentary lifestyle*
- Smoking*

- High cholesterol*
- Age/Gender
- Family history

Speak with your doctor about how to treat your modifiable (*) risk factors and learn to be heart safe.

What To Do When Seconds Count

- Call 9-1-1, immediately. Early treatment can greatly reduce heart damage and be the difference between life and death.
- Treatment starts the moment EMS arrives. Paramedics can provide oxygen, start an intravenous, and perform an electrocardiogram (ECG).
- Paramedics can also administer important medication(s) in the early minutes of a heart attack to lessen heart damage.
- During transport, EMS will share information with the hospital so that definitive treatment can begin immediately upon arrival.
- Take a CPR/AED course. Training is widely available from many reputable organizations. It's easy and could make a significant difference in the outcome of someone experiencing a heart attack.
