# Volunteerism

Have you considered volunteering for the Braeside Community Association (BCA)? I can speak from my own experience volunteering with my Community Association (CA) that I have been able to give back to my community while forming new friendships, learning about new cultures, having some great laughs, and meeting people with similar interests. I can attest that I was not involved in my CA for many years and had no idea what events and activities were available for the community until I bought a membership when some folks came to my door asking if our family would like to join.

Since then, I have found myself more engaged and connected with my community. I have a deepened sense of pride in the community that I live in and feel an overwhelming sense of belonging. Not only have my kids become super involved, but I am happy to see them giving back and engaging with other teens and seniors that they may not have met previously. Leading by example through volunteerism has become a great bonding experience for my family and we have all become closer because of it.

Volunteering within the community can look like as little or as much time as you are able to share. At the BCA, we have volunteers that come in and keep our Book Nook looking amazing by sorting through donations, hosting book sales, and cycling through our books to keep fresh titles at the forefront of our shelves. Thank you, Janice and Marilyn!

We also have volunteers who maintain and flood our ice rinks. Right now, this is one of the larger volunteer roles at Braeside and we could really use more hands! You know the old adage, "many hands make light work." Planning for the 2023/2024 skating season starts now. The rink is one of the volunteer positions where having many people can yield nominal time commitments. Can you help out with the rink this year? Email [rink@braesideyyc.ca](mailto:rink@braesideyyc.ca) and learn more!

If I haven't convinced you yet, I encourage you to come attend a community event, stop by the Community office and introduce yourself, or purchase a membership. Lots of great events and activities are being planned and we would love your input and ideas. Committees are another great way to volunteer your time doing something you enjoy. Don't see a committee yet that interests you, share your ideas with us! Email [operations@braesideyyc.ca](mailto:operations@braesideyyc.ca).

**VOLUNTEERS NEEDED!**

**BRAESIDERS WE NEED YOUR HELP!**

The Braeside Community Association is looking for dedicated individuals to join us in our mission to make a positive impact in the community.

- Rink Committee

Can you help? Please email [operations@braesideyyc.ca](mailto:operations@braesideyyc.ca)

## The Spotted Lake

Located near Osoyoos, BC, Spotted Lake is a mineral-rich body of water that evaporates every summer. Calcium, magnesium, and sodium sulphate deposits are left behind in small circular pools, each a different colour. It's no wonder that this otherworldly place is sacred to the indigenous Sylix people of Okanagan!

# Staying Healthy When You Travel

from Alberta Health Services

The best way to stay healthy on your trip is to plan ahead. Talk with your doctor several months before you travel to another country. It's also important to allow enough time to get the vaccine doses that you need. For example, if you need the hepatitis A vaccine, you'll need two doses spaced at least six months apart. Also ask your doctor if there are medicines or extra safety steps that you should take. Check with your local health unit or travel health clinic for other travel tips.

### Get Necessary Vaccines

Make sure that you are up to date with your routine shots. They can protect you from diseases such as polio, diphtheria, and measles. These diseases are still a problem in some developing countries.

Get other vaccines that you may need. Your doctor or a health clinic can tell you which ones you need for your travels. Here are some examples:

- Hepatitis A vaccine - if you are traveling to developing countries.
- Yellow fever vaccine - if you are visiting places in South America and Africa where the disease is active.
- Typhoid fever vaccine - if you are traveling to Central and South America, Africa, or some areas of Asia.

### Bring Medicine with You

If you take medicine, bring a supply that will last the length of your trip. Get a letter from your doctor that lists your medical conditions and the medicine that you take. Bring prescriptions for refills if you will be gone for a long time. Also bring any medical supplies that you may need, such as blood sugar testing supplies or insulin needles.

If you are going to an area where malaria is a risk, ask your doctor or health clinic for a prescription to help prevent infection. This medicine works best if you take it before, during, and after your trip.

You may want to bring medicine for traveller's diarrhea. Over-the-counter medicines include:

- Bismuth subsalicylate (Pepto-Bismol)
- Loperamide (Imodium)

Your doctor may also prescribe an antibiotic to take with you. If so, take it as directed. This can treat diarrhea if you're going to an area where modern medical care isn't readily available.

### Make Safer Choices as You Travel

Practice safer sex. Using condoms can prevent sexually transmitted infections.

In areas where mosquito-borne illnesses are found, use DEET insect repellent. Wear long pants and long-sleeved shirts. Use mosquito netting to protect yourself from bites while you sleep.

Many developing countries don't have safe tap water. Only have drinks made with boiled water, such as tea and coffee. Canned or bottled carbonated drinks, such as soda, beer, wine, or water, are usually safe. Don't use ice if you don't know what kind of water was used to make it. Don't use tap water to brush your teeth.

Be aware that you could be injured in cars, boats, or public transportation. Driving can be dangerous due to bad roads, poor driver training, and crowded roadways. Always wear your seat belt if available. If you hire a driver or taxi, ask the driver to slow down or drive more carefully if you feel unsafe.

Air pollution in some large cities can be a problem if you have asthma or other breathing problems. Avoid such cities when air quality is poor or stay indoors as much as possible.

Be careful around dogs and other animals. Dogs in developing countries are often not tame and may bite. Rabies is more common in tropical and subtropical regions.

If you're going to a place that's much higher above sea level than you're used to, ask your doctor how to avoid altitude sickness. Your doctor may also prescribe medicine to help treat it.

## Hawaiian Rice Bowl

by Jennifer Puri

Rice is a grain that grows to 4ft. in height, produces small edible seeds, and thrives in warm, wet climates.

It is the world's largest food crop and evidence of rice farming, dating back ten thousand years, has been found in the Yangtze River valley of China.

There are two types of rice – Asian Rice and African Rice and the length and width of the rice (once it is cooked) determines if it is short, medium, or long.

White rice is more commonly consumed than brown, black, or red due to its ease of cooking and long shelf life. Rice should always be washed before cooking as it will rid the rice of any starch that may be attached to the grain. It also prevents the grains from sticking to each other during the cooking process.

China is the world's largest producer and contributes to the daily rice intake of 3.5 billion people in Asia, Africa, and South America.

Steamed, boiled, fried, or ground, rice shows up as an ingredient in Spain (paella), Italy (risotto), Japan (sushi), India (pillau), Malaysia (nasi lemak), Korea (bibimbap), Africa (jolloff), Brazil (galinhada), or in its simplest form poke or Hawaiian Rice Bowl.
