Fresh Jock

No matter how much you sweat, we can get the stink out!

We offer cleaning services for sports equipment and personal protective equipment, including helmets, shoulder and elbow pads, knee and shin pads, footwear, skates, or gloves – almost any equipment used by athletes or workers can be cleaned, disinfected, & refreshed.

OUR OZONE PROCESS

Using ozone, our system breaks down and penetrates stains, mucus, blood, sweat, fungus, bacteria, and mould. Ozone destroys 99.9% of bacteria and viruses it comes in contact with – this includes odour causing bacteria and illness causing viruses, like staph infections.

Memberships

Support your neighbourhood by joining our community association. Membership fees (\$10 to \$20) help pay for events, programs, and maintenance of the community hall.

Discover the benefits of a membership and sign up today at rosscarrock.org/membership.

ROSSCARROCK SKILL SHARE OPPORTUNITY

Are you an artist? Do you love to paint? We are looking for a resident in Rosscarrock who has a background in painting and would be willing to teach their skills to residents in Rosscarrock. The art created would be placed in our community hall.

If this is something you are interested in, please reach out to our community social worker, Kellie Nixon, at Kellie.Nixon@calgary.ca.

GAMES & PUZZLES

Guess That Song!

1. This Grammy award winning pop song is about being foolishly apologetic for constantly playing with new lovers' hearts. Oops!
2. This thrilling hit pop song is about a woman being stalked by a beast about to strike.
3. This 2014 electro-pop song is about meeting someone in the summer, falling in love in the fall as the leaves turned brown, and then being betrayed by lies.
4. This heartfelt alternative rock ballad is all about wanting to skip right to October because summer has come and passed.
5. This country song is about going out and having fun with no inhibitions, just feeling womanly and dancing with your girlfriends on a night out.
6. This gentle pop rock song is about being so in love with someone that they colour your world and make the stars shine for you.

Heat Related Illness

from Alberta Health Services

EMS would like to remind everyone to stay safe in the heat and sun this season. While children and the elderly may be more susceptible to the effects of heat and sun, basic prevention measures should be taken by all to avoid a heat related illness during periods of hot and humid weather.

Heat Exhaustion

- Heat exhaustion can occur due to excessive fluid loss during periods of prolonged sweating in a hot and/or humid environment (indoors or outdoors).
- Patients may suffer headaches, weakness, fatigue, nausea/vomiting, thirst, chills, and profuse sweating.
- The patient is usually cold and damp to the touch and the skin may appear pale or dusky gray.

Heat Stroke

- Heat stroke is a medical emergency which, without prompt treatment, could be fatal.
- It occurs when the body can't cool itself naturally (e.g., perspiration). The body's temperature will continue to rise to dangerous levels.
- Due to severe dehydration and the inability to sweat, the patient may appear flushed, and skin may be hot and dry to the touch.

First Aid

- First aid for all heat related illness begins with removing or sheltering the patient from the hot environment.
- Remove excess, or tight-fitting clothing, and allow them to rest in a cool environment.
- If the patient is conscious and alert, provide suitable fluids such as water, juice, or a sports drink.
- If you are concerned, seek medical attention.

Prevention

- Stay well-hydrated by drinking plenty of water at all times.
- Be aware that excessive alcohol consumption will promote dehydration.
- Always wear a broad brimmed hat to keep the sun off your face and neck.

- Apply a broad spectrum, waterproof sunscreen with a minimum SPF of 30+, especially for children. The sun's UV rays peak between 11:00 am and 3:00 pm, even on cloudy days.

Proper Disposal of Smoking Materials

from the City of Calgary

Improper disposal of smoking material such as tobacco products is the leading cause of outdoor fires in Calgary. To help reduce outdoor fire risks, citizens should make an effort to properly dispose of smoking material. Remember to always call 911 to report a fire.

To Better Protect Your Homes, it is Recommended That You:

- Never put out cigarettes or smoking material in flower planters, peat moss, your lawn, or garden.
- Use a deep, wide, sturdy metal container with a lid, filled part way with sand or water that should be emptied regularly.
- Ensure that all butts and ash are out by soaking them with water prior to putting in the trash.

Smoking in Natural Areas

Extreme caution should be used in the city's natural areas and green spaces where extremely dry vegetation covering the ground provides readily combustible fuel if an ignition source is applied.

Reducing Risk

- Do not store propane tanks, firewood, or yard waste next to your house.
- Prune all tree branches within two metres of the ground and plant new trees at least three metres apart.
- Assess potential fire hazards within 1.5 metres of your home, including natural debris, trees, and other structures.

Smoke Alarms

Having working smoke alarms saves lives – more than one-third of all fire fatalities are associated with having no smoke alarm.

Cigarette Litter

Did you know that cigarette litter is a major environmental concern and contributes to a disproportionate amount of litter in our city? Contrary to popular belief, those white sponge-like butts are not made from cotton or paper — instead, they're a

synthetic microfibre that takes years to break down and are unsightly around our city.

- Cigarette filters are one of the most littered items in the world.
- Chemicals that can leach out of cigarette butts include arsenic, ammonia, and lead. The chemicals found in one cigarette butt can leach out and contaminate approximately 7.5 litres of water within one hour. This contaminated water is lethal to aquatic life.
- Sunlight will degrade a cigarette filter and break it into very small particles. These small pieces do not disappear or biodegrade but wind up in the soil or swept in water, contributing to water pollution.
- The fines for the improper disposal of cigarette litter ranges from \$250 to \$500, with a maximum fine of \$750 for throwing a butt out of a car window.

If you're a smoker, consider buying a pocket ashtray available locally and from popular online retailers.

How to Get the Most Out of Your Counselling/Therapy Sessions

by Nancy Bergeron, R.Psych. | nancy@viewpointcalgary.ca

Adapted from Dr. David Burns

We understand that therapy can sometimes be challenging

People often report that unburdening their emotions and past experiences in the first few sessions is relieving. However, therapy often uncovers deeper issues. Opening up and getting to the heart of these concerns takes patience, persistent effort, and fostering a positive relationship with your counsellor. It takes time to build a strong therapeutic bond and rapport, and this is essential in creating the trust necessary to go to those deeper places where real change takes place.

Consistency will help you reach your goals

If you wanted to improve your fitness and saw your physical trainer once every three months, you probably wouldn't be surprised when you didn't see the results you wanted. Similarly, therapy needs commitment and consistency to work through your concerns and be effective. Of course, your counsellor understands there are many demands on your time and resources. By collaborating with your counsellor, you can create a reasonable plan that balances

your commitment to your wellbeing with all your other commitments. This is also why sometimes your therapist may assign you homework or other types of activities to practice between sessions.

Providing feedback will help your counsellor know what is/isn't working for you

Counsellors strive to build positive, non-judgmental, and compassionate therapeutic relationships, understanding this is beneficial for you and the therapeutic process. Despite this emotional and professional commitment, challenges in therapy can sometimes break down open communication and hinder the process. Providing feedback allows your counsellor to understand what has happened and work to repair any concerns you may have. A great therapist will provide a feedback form that can be filled out at the end of each session. Here you can let your therapist know what you liked best in the session, what you liked the least, and if there were things you had hoped to discuss that may have been missed. This allows your therapist to constantly adjust and better hone their skills to your needs.

Mutually agreeing to end therapy when you are ready

When you and your counsellor recognize you are ready to move on, it can be exciting for both of you. In order to ensure you finish on a positive note, your counsellor will help you plan how to maintain your progress and what to do if you encounter concerns again. You have a fresh start, and your counsellor will be there in the future if needed.

Sometimes clients end therapy without talking with their counsellor, leaving their counsellor to wonder what happened. Not only can this make it more difficult for clients to maintain progress, but they may also feel they have lost a potential future support. If the counsellor can't reach the client, it also leaves the counsellor wondering what happened. Did my client feel enough progress had already been made? Did something go wrong? Did I say or do something that upset my client? Counsellors invest emotionally and professionally in the therapeutic relationship and appreciate feedback that lets them know what is happening. Your counsellor will always strive to treat you and your decisions with compassion and respect. In return, you can help your counsellor by communicating any concerns and showing that you understand they deserve compassion and respect too.
