Happy Birthday, Keanu!

September 2 is Canadian actor Keanu Reeves' birthday! Known for his kind and respectful nature, this Hollywood A-lister comes from humble Canadian beginnings. As a teen, Keanu worked in a Toronto bakery and at an arena sharpening skates. He also found success as a hockey goalie and aspired to be on the Canadian Olympic team!

Dementia Advice Line Connects Albertans to Care

from Alberta Health Services

Individuals living with dementia, and their caregivers, can now be connected directly to a specialized dementia nurse through Health Link 811 as part of

changes to the dementia advice line. This will better connect caregivers and those with dementia, including Alzheimer's, to timely advice and care.

Between 8:00 am and 8:00 pm daily, Albertans can call Health Link at 811 and press the option to speak to a nurse specializing in dementia. They will answer your call, go through an assessment, and provide advice and resources for your immediate concerns. Previously, callers needed to speak to a Health Link nurse, get a referral, and then receive a response within 72 hours from a dementia nurse.

After hours, Health Link staff will assess your needs and provide advice for your immediate concerns. When needed, you will be referred to a specialized dementia nurse for additional advice.

The dementia nurse, who has extensive training and experience in seniors' health, will be able to provide an in-depth assessment to gain an understanding of each situation. The dementia nurse will provide support and advice to patients and caregivers and can connect callers to services available in their community.

Currently, about 40,000 Albertans are living with dementia, a syndrome that affects memory, thinking, orientation, judgment, and the ability to carry out daily activities.

The number of dementia cases is expected to more than double in Alberta as the baby boom generation moves into older age. By 2038, it is estimated that about one in 10 Albertans over the age of 65, and nearly half over age 90, will be living with dementia.

For more information, call 811 or visit our website.

Brunch Asparagus with Goat Cheese

by Jennifer Puri

Native to the Mediterranean, the roots of the asparagus plant can be traced back to the ancient Egyptians, Romans, and Greeks. Records show it was a prized vegetable in Rome during the Middle Ages. Asparagus saw a rise in popularity in France during the reign of Louis XIV and was enjoyed by fashionable society across Europe. Asparagus was always considered a luxury item until recent times.

Asparagus or “sparrow grass” has been referred to as the King of Vegetables and is low in calories, high in fiber and folate, and rich in vitamins, minerals, and antioxidants.

There are 300 species of asparagus and people have been eating these dark green vegetable spears with tiny leaves on top for centuries. Asparagus has a distinct flavour and is related to onions, leeks, and garlic. Green asparagus is eaten worldwide. White and purple asparagus are sweeter and more flavourful.

Contrary to popular belief, thickness is not an indication of toughness or tenderness. Asparagus stalks are thick or thin from the moment they spring from the ground.

Asparagus can be steamed, sautéed, grilled, or roasted as it is in the following brunch asparagus with goat cheese recipe.

Prep Time: 20 minutes

Cook Time: 25 minutes

Servings: 3 to 4

Ingredients:

- 1 lb. Asparagus spears
- 1 tbsp. Dijon mustard
- 2 tbsp. rice wine vinegar
- ½ tsp. salt
- ½ tsp. coarse ground black pepper
- ½ cup extra virgin olive oil
- 2 cups of cubed white, brown, or multigrain bread
- 2 cups of cherry tomatoes
- ½ cup of crumbled goat cheese or feta cheese
- 2 tbsp. of finely chopped parsley, basil, or chives

Directions:

- Prepare marinade by combining mustard, vinegar, salt, pepper, and olive oil in a small bowl. Stir until all ingredients are blended and form a smooth mixture.
- Heat Oven to 375 degrees Fahrenheit.
- In a medium size bowl, toss together bread cubes, cherry tomatoes, and 2 tbsp. of the marinade. Spread the bread cubes and cherry tomatoes in a single layer on a baking tray. Place tray on the middle rack of the oven and bake until bread cubes turn a light brown and cherry tomatoes have softened (approximately 12 minutes).
- Remove from oven and set aside.
- Increase oven heat to 400 degrees Fahrenheit.
- Prep the asparagus spears by rinsing under cold water and patting dry with paper towel. Remove and discard the tough bottom parts of the spears and then spread them in a single layer on a foil lined baking tray. Drizzle remaining marinade over the spears and then place on the middle rack in oven. Bake time is 8 to 10 minutes for thin spears, 10 to 12 minutes for medium spears, and 12 to 14 minutes for thick spears.
- Remove asparagus when cooked and arrange on a serving platter. Top with croutons, cherry tomatoes, crumbled goat cheese, and garnish with chopped fresh parsley, chives, or basil leaves.

Brunch asparagus with goat cheese can be served at lunch or brunch and pairs well with eggs, roast ham, chicken, or turkey.

Bon Appétit!

Guess That Animal!

1. Male _____ are the only creatures in the animal kingdom to undergo pregnancy and give birth.
2. This tree-hugging marsupial's fingerprints are almost indistinguishable from humans, which has confused some forensic crime scene investigators.
3. This monogamous species mates for life and courts one another by gifting each other pebbles.
4. This large rodent is one of the friendliest in the animal kingdom and has been known to befriend crocodiles, monkeys, dogs, and even humans!
5. The _____ is the only mammal that can truly fly and not simply glide.
6. _____ are the only venomous primates; their armpits secrete venom that they lick to coat their teeth before attacking and biting.

Word of the Month

Metanoia: noun
(met-uh-noi-uh)

A transformative change of heart.

“Upon finishing her book, Alice experienced a metanoia.”

Stargazing with Pat J

Supernova: Going Out With a Bang

by Patricia Jeffery © 2023 Calgary Centre of the Royal Astronomical Society of Canada

In 1054, Chinese astronomers noticed a new star that was so bright that it was visible during the daytime for three weeks before slowly fading from view.

Every star begins life as a cloud of gas and dust. Gravity causes the cloud to condense which increases pressure and temperature until nuclear fusion occurs in the core and the star ignites. As hydrogen is converted into helium, energy is released, which produces an outward force that counteracts gravity, creating a delicate equilibrium that can persist for millions, even billions of years.

The fusion reaction in a massive star needs to happen at a faster rate in order to sustain the balance with gravity. As a result, these stars burn brighter and hotter, shortening their life span in some cases to only a few million years.

When a star runs out of hydrogen, the core can no longer generate energy by nuclear fusion, but as it contracts, heat is generated, which causes the star's outer layers to expand and cool, transforming the star into a red giant.

After converting all the helium to carbon, the star works its way through the periodic table, fusing elements which produce less and less energy until it arrives at iron, which unfortunately produces zero energy. Suddenly unopposed, gravity squeezes the core, raising its temperature to over 100 billion degrees Celsius. The pressure is so great that electrons and protons combine to form neutrons. The moment this occurs, the compressed neutrons rebound with such force that they overcome gravity and the star explodes. If the recoil isn't strong enough, gravity will crush the core into infinity, creating a black hole.

The supernova that the Chinese astronomers witnessed is known today as M1: the Crab Nebula. Located in constellation Taurus, M1 is all that remains of a star ten times larger than our Sun; yet, its heart still beats in the form of a wildly spinning neutron star, which like a lighthouse, ejects twin beams of radiation out into space at 30 pulses per second.

Call for Help with Child Development Questions

from Alberta Health Services

Parents, guardians, and caregivers who have concerns about their child's development and well-being can now receive free advice and guidance through a new phone service.

By calling Health Link at 811, Albertans with concerns about their child's development — including speech, movement, and hearing — can be redirected to the new pediatric rehabilitation line and speak with an occupational therapist or another appropriate allied health professional.

The new pediatric rehabilitation line provides advice to parents and caregivers of infants, children, and youth (birth to 18 years of age) who have concerns about developmental milestones in areas such as:

- Moving and playing (crawling, walking, coordination, playing with toys, using utensils)
- Talking and listening (babbling, using words and sentences, speech sounds, understanding directions, stuttering, voice quality)
- Taking care of self (dressing, toileting, sleeping)
- Managing emotions (calming self, becoming overwhelmed or overstimulated)
- Difficulty eating or swallowing (coughing, gagging)
- Hearing (responding to sounds, noise, voices, words)

The pediatric rehabilitation line can also help callers who are looking for local services and/or current rehabilitation resources (e.g., links to information or webinars), or need support to help a child or youth recover from COVID-19.

AHS also offers free webinars that cover developmental topics for children and youth from birth to 18 years of age. Topics range from toilet training and tummy time to emotional regulation and speech development.

Hosted by pediatric rehabilitation professionals, the AHS webinar series is designed for all parents and caregivers. It may be especially beneficial for those with children and youth who may be developing differently or who have medical conditions that are affecting their development.

Most sessions are live, meaning participants can ask questions during the session. Some sessions are pre-recorded.

Each webinar is free of charge and will focus on a specific developmental skill such as walking, talking, listening, and more. Parents and caregivers will build skills and gain confidence by learning practical ways to help children and youth improve their skills while supporting development.

The free webinars are delivered on Zoom and require registration in advance. Information and registration for the free webinars can be accessed at myhealth.alberta.ca/pediatric-rehabilitation/webinars. You may also find information by searching “pediatric rehab” at together4health.albertahealthservices.ca.
