CANADIAN UNICORNS

Around 75% of the world's narwhal population calls the northern waters of Nunavut, Canada, home. These real-life "sea unicorns" thrive in our Arctic waters, especially in the summer months. How magical!

In Loving Kindness

by Garth Paul Ukrainetz

Be not abashed when life is tough
No shame in having need
At times the road is harsh and rough
Confused this world indeed

It's crucial that we all reach out
In giving and receiving
To rise above the walls of doubt
Together we're believing

We're here to care, we're here to share
For that's what life's about
In loving kindness, hearts prepare
The Food Bank helping out

Window and Balcony Safety

by Alberta Health Services

With the return of warmer weather, Emergency Medical Services (EMS) would like to remind parents and caregivers of an often-overlooked hazard in the home – access to open windows. Every year, paramedics respond to emergencies where a child has fallen from an open window, often from the second floor. These can be avoided by following safety measures. Take the time to assess potential hazards in your home before a preventable fall occurs.

Windows and Screens

- Prevent access to windows by moving furniture such as cribs, beds, stools, and change tables out from under them.
- Keep drapery cords out of children's reach. Wrap excess cord around cleats or tie-downs to avoid a choking hazard.
- Remember, screens are not safety devices. They are designed to keep bugs out, not children in.

Balconies

- Do not underestimate a child's ability to climb. Furniture and other items stored on balconies and decks can be used to climb resulting in falls over the railing.
- Ensure that your balcony railings are not more than 10 cm (4 inch) apart. This will eliminate access between the vertical bars of a balcony or deck.

Further Prevention Tips

- Toddlers and preschoolers are at highest risk of falling from a window or balcony, but it may happen at any age.
- Direct supervision of children is the single most effective way to prevent falls from windows and balconies.
- Install safety devices which limit the distance in which a window can open to a maximum of 10 cm (4 inches).
- Ensure the safety device can be released quickly, so the window can be used for escape in case of emergency.
- Consider purchasing a portable air conditioner, which will enable windows to stay closed and secure.

EMS is proud to be a member of the Partners Promoting Window and Balcony Safety. Take time to assess your home for window and balcony hazards and eliminate the risks before a preventable fall occurs.

FEDERATION OF
CALGARY COMMUNITIES

Get Involved and Learn About Calgary's New Zoning Bylaw

by Federation of Calgary Communities

Since October 2023, the City Building Program team has been working with Calgarians to learn what they value and experience living in Calgary, and to plan for the future of how we move, build, and use land across the city.

The City Building Program includes the Calgary Plan (merges the current Municipal Development Plan and Calgary Transportation Plan into one document), the Zoning Bylaw (currently the Land Use Bylaw), and Street Manual (currently the Complete Streets Policy and Guide). All three of these documents have been drafted based on four phases of public engagement, existing policies, Council priorities, partnering with the Indigenous community and equity-denied groups, and consultation with interested parties.

While the Calgary Plan was brought to the Infrastructure and Planning Committee and deferred until Q2 2026, the Zoning Bylaw draft is still seeking public input and feedback.

Curious to know what the Zoning Bylaw is and how it impacts you? This upcoming fifth phase of engagement will continue building awareness and education on the Zoning Bylaw and how it ties into the Street Manual and the Calgary Plan.

Your voice matters. We want to hear from you to ensure the new Zoning Bylaw meets the needs of our growing city. You can participate online or at in-person events around the city from May 5 to 31, 2025, and subscribe to our newsletter for project updates.

For more information, visit calgary.ca/citybuilding or email citybuilding@calgary.ca.

Six Ways to Stand Up for Yourself

by Nancy Bergeron, R.Psych. | info@nancybergeron.ca

People-pleasing is a common pattern where individuals prioritize others' needs or desires over their own...often at the expense of their well-being. Overcoming this behaviour takes self-awareness, boundary-setting, and practicing self-care. Here are six ways to stop people-pleasing:

1. Recognize and Acknowledge the Behaviour

The first step in breaking free from people-pleasing is to recognize when you're doing it. Notice if you're constantly agreeing to things you don't want to do, neglecting your own needs, or avoiding conflict at all costs. Once you can identify these patterns, you can start taking steps to address them.

2. Set Clear Boundaries

Setting healthy boundaries is essential to stopping people-pleasing. This means learning to say no without guilt and making it clear what you can and cannot do. Practice asserting yourself calmly and confidently when someone asks for something that goes beyond your limits. You don't have to provide an explanation for your boundaries — just saying "I can't do that right now" or "That doesn't work for me" is enough.

3. Understand and Prioritize Your Own Needs

People-pleasers often suppress their own needs in favour of others. To stop this, be mindful of your own feelings and desires. Make a habit of checking in with yourself regularly. What do you need in the moment? What are your values? Prioritizing your own emotional, mental, and physical well-being helps you stop being overly concerned with other people's approval.

4. Challenge Your Fear of Disappointment or Conflict

A lot of people-pleasers fear disappointing others or facing conflict. Shift your mindset by reminding yourself that it's okay to disagree or say no. You don't need to make everyone happy, and people's reactions to your boundaries don't define your worth. Over time, you'll become more comfortable with discomfort and realize that you can handle others' feelings without compromising your own.

5. Learn to Tolerate Guilt and Discomfort

It's natural to feel guilty when you start saying no or standing up for your needs, especially if you're used to pleasing others. Practice tolerating that guilt and discomfort. Understand that feeling bad doesn't mean you've done something wrong — it simply means you're making a change. As you practice, this guilt will lessen, and you'll become more comfortable with acting in ways that align with your values.

6. Surround Yourself with Supportive People

Having people around who respect your boundaries and encourage your personal growth can help you feel empowered to stop people-pleasing. Seek relationships that are balanced and reciprocal, where your needs are valued just as much as others'. Positive, supportive people will help you feel more confident and less likely to fall back into people-pleasing behaviours.

Changing people-pleasing habits takes time, but with consistent effort and practice, you can learn to prioritize your own needs and create healthier, more authentic relationships.

Celebrating Calgary 150 - Sandstone City

by Anthony Imbrogno (*The Calgary Heritage Initiative Society/Heritage Inspires YYC*)

Why is today's downtown core located west of Fort Calgary? In the 1880s, Inglewood was growing in anticipation of the railway, but then Canadian Pacific Railway built its station where the Calgary Tower stands today. Much of the fledgling town picked up and moved.

Civic leaders then built bridges and ran the Stampede's forerunner, the 1886 International Seed Grain and Hay Exposition. The first General Hospital opened in a house, performing surgeries on the kitchen table.

Calgary's first buildings were constructed with wood, but 18 were destroyed in the Great Fire of 1886. Afterwards, town council mandated building with sandstone from the surrounding foothills.

Hence the nickname Sandstone City. See for yourself along Stephen Avenue National Historic Site. Imperial Bank helped make it Calgary's commercial core. The Alberta Hotel followed, and HBC built a department store in 1891.

Smallpox killed several people in 1892, sparking a riot when fearful residents attacked Chinese laundries, the purported source of the outbreak. Many thousands of Chinese had worked on the CPR and settled in Calgary.

An influx of Russian Germans fleeing persecution arrived in 1892 in Bridgeland-Riverside. Ukrainians and Italians followed. Nuns like Mary Greene established Sacred Heart Convent in 1885. Édouard Rouleau became head physician of Holy Cross Hospital.

The CPR took advantage of the Rocky Mountains' picturesque landscapes. Near Siding 29, Banff townsite emerged in 1883. The presence of hot springs led the government to create a national park in 1887. Opened one year later, Banff Springs Hotel is a modern-day castle, with another one built on Hornumnay ("little fishes' lake", aka Lake Louise).

The park's founding saw the exclusion of Indigenous people. They also faced Residential Schools that

isolated students from their culture and families under sometimes terrible conditions.

At today's Fish Creek Provincial Park, William Roper Hull built a two-storey Tudor Revival-style ranch house. Also, there was Shaw's family homestead and woollen mill. A store on Stephen Avenue sold their goods to many customers headed for the Yukon's Klondike Gold Rush.

Sandstone City was a beacon on the prairies, connected to the world via railway and offering opportunities to many.

Colorectal Cancer Screening Saves Lives

by Alberta Health Services

Colorectal cancer is one of the most common causes of cancer deaths in Alberta, often affecting people over 50 with no family history of the disease.

Colorectal cancer develops in the colon (large intestine) or rectum and can begin as growths called “polyps” on the inner wall of the colon or rectum. Not all polyps turn into cancer, but some types can with time. Early-stage colorectal cancer and polyps can exist for years, without symptoms.

Get screened regularly, especially if you are between 50 and 74-years-old. Screening looks for early signs of cancer in people who feel well and have no symptoms. With regular screening, colorectal cancer can be found early, and many types of polyps can be removed before they turn into cancer.

Screening Tests for Colorectal Cancer

The two main screening tests for colorectal cancer are Fecal Immunochemical Test (FIT) and colonoscopy. You and your healthcare provider can discuss which test is right for you.

Fecal Immunochemical Test (FIT)

FIT is the recommended screening test for people at average risk of getting colorectal cancer. Most people are at average risk. Average risk means those with no symptoms and no personal or family history of colorectal cancer.

FIT is an easy, at-home test that checks for hidden blood in your stool. You collect a small stool sample and take your completed FIT to the lab for testing. You should plan to do the FIT every year starting at age 50.

There are two easy ways to get your free FIT:

- Talk to your doctor about colorectal cancer screening. They'll give you a lab requisition form. Take this form to the lab to pick up your FIT.
- Order online at screeningforlife.ca or call AHS Screening Programs toll-free at 1-866-727-3926. We'll mail you a FIT.

If your FIT result is normal, it means that no blood was found in your stool sample. You should continue to

screen with FIT regularly. If your FIT result is abnormal, it means that blood was found in your stool sample. This can happen for different reasons.

While most people with an abnormal result do not have cancer, your doctor or healthcare provider may recommend a colonoscopy to find the cause of the bleeding.

For every 100 colonoscopies after an abnormal FIT, two to three cases of colorectal cancer are detected. Early detection leads to a 90% treatment success rate, making regular screening essential.

Colonoscopy

Colonoscopy is the recommended test for people at an increased risk of getting colorectal cancer. You may be at increased risk if you or someone in your family such as a parent, sibling, or child had colorectal cancer in the past. Colonoscopy is also the recommended follow-up test after an abnormal FIT result.

A colonoscopy lets the doctor see the inside of your colon. This test is done using a colonoscope, which is a long, thin, flexible tube with a light and camera on the end.

Colorectal Cancer Signs and Symptoms

Never ignore new symptoms including blood in your stool, a change in your bowel habits, pain in your belly, or unexplained weight loss. See your doctor or healthcare provider if you develop these or any other symptoms you're worried about. These symptoms may not be caused by cancer, but speaking to your healthcare provider can help you know for sure.

Create a Beautiful and Resilient YardSmart Yard This Spring!

by The City of Calgary

A YardSmart yard stays beautiful longer during hot and dry weather compared to yards completely planted with grass. The City's YardSmart program provides helpful resources that show you how to how to plan, build, and maintain your yard, including:

- Layouts and plant lists for all over your yard – wet, full sun, partial sun, and shade areas.
- Easy to follow information on planting, watering, and maintenance.
- How-to videos including how to garden on a budget and creating a pollinator-friendly yard.

Remember, new plants need lots of water to get established, especially during the heat of summer. You can do your part to reduce your water consumption and help your yard and garden retain moisture by:

- Installing a rain barrel to use in your yard and garden. It is a simple, yet effective way to reduce your water use by acting as a backup source of water.
- Only giving plants the water they need.
- Mowing less often to keep your grass five to seven cm (two to three inches) high to shade the soil.
- Replacing portions of your lawn with garden features that use less water and help absorb rainwater such as low water-use perennials and shrubs, lawn alternatives, or groundcovers.
- Adding good quality soil to help retain moisture and mulch on top to reduce evaporation.

To learn more about how to create a beautiful, resilient yard and garden that uses less water, visit calgary.ca/YardSmart.
